IFace502H

Face & Fingerprint
Time Attendance And
Access Control Terminal

XIMI has released the IFace502H Multi-Biometric T&A and Access Control Terminal which supports 1,200 face templates, 2,000 fingerprint templates and 10,000 cards (optional). It is equipped with XIMI latest hardware platform and algorithm, which provide clients with a brand new UI and user-friendly operating interface, bringing them a smooth using experience. With the advanced face algorithm and multi-biometric verification technology, the terminal's security level of verification is greatly enhanced.
Features

• 1,200 face and 2,000 fingerprint templates

• Multi-languages

• High verification speed

• Advanced and user-friendly UI

• Chip encryption for firmware protection

• Optional built-in battery backup providing approximately 4 hours of continuous operation

• Easy to extend functions and customize client's requirements

• One face template is registered for one user only

• Able to detect whether the face is an actual face or a photo,

 enhancing the security level of verification
